HEADQUARTERS
Jaraguá do Sul - SC
Brazil

THE WORLD INSPIRES US TO CREATE, THE MARKET MOTIVATES US TO GROW.

Over 25 years of experience:

We operate in the Signage, industrial, and construction markets.

Focus on innovation:

We use cutting-edge technologies to deliver agile and efficient solutions.

Commitment to quality:

Products developed according to the highest standards, meeting both national and international demands.

Sustainability and profitability:

Continuous progress focused on efficiency and productivity, doing more with less.

Market leadership:

We are one of the leading suppliers in the ACP, acrylic, polycarbonate, PS, PETG, PVC, and banner materials, offering complete and innovative solutions for the construction and architecture, signage, and industrial sectors

PURPOSE

Contribute to the peoples's **GROWTH**.

MISSION

GROW by generating value for our **CLIENTS**.

We work to generate opportunities for **FAST**, **CONTINUOUS**, and **SUSTAINABLE** growth and development for all our **CLIENTS**, Bolders, and the communities where we are present.

VISION

A BRAZILIAN MULTINATIONAL, driven by growth and made up of people who dream big.

The desire to grow moves us and inspires us every day.

Our operations span the Civil Construction, Industrail, and Signage segments, **GROWING** with simplicity, flexibility, agility, and strong relationships.

VALUES

We respect GOD and FAMILY.

First and foremost, we respect **GOD** in all His denominations and **FAMILY** as the foundation of society.

We dream BIG.

We have an aversion to "It's impossible" or "It can't be done."

The WORLD inspires us.

PEOPLE and DIVERSITY.

We reward our "TALENTS," providing **GROWTH** opportunities through their own merits.

We SERVE the CLIENT.

With joy, humility, and flexibility, aiming to be a reference in customer relationships.

WE ARE ALL OWNERS.

We are a company made up of **OWNERS**. Owners take responsibility for their results.

Leadership by EXAMPLE.

We do what we say.

We are FAST and EFFECTIVE.

We do **MORE** with less.

We are TRUTHFUL and OBJECTIVE always.

We don't need gimmicks to achieve or explain something.

We are ECONOMICAL.

We aim to secure more resources to support our **GROWTH**, in a sustainable and **PROFITABLE** manner.

Opening of the sixth branch, in Chapecó-SC

Opening of the tenth branch, in Florianópolis-SC.

Opening of the eighth international branch, in Concepción, Chile.

Expansion from Diadema - SP to São Bernardo do Campo - SP.

Manufacturing Facility

Quality and innovation in every detail

With over 70,000 m² dedicated to materials processing, our manufacturing facility is the heart where innovation and customization come together. Here, we use the most advanced production processes in the market to meet **each client's specific needs with excellence.**

Our specialty is adding value through a manufacturing process that simplifies installation and ensures precision in every piece. Our industrial facility is a competitive advantage, equipped with cutting-edge technology and a dedicated team committed to turning ideas into reality. With personalized service and a strong commitment to quality, we offer much more than products — we deliver solutions that make a difference for your business.

Acrylic Sheet Factory

A manufacturing plant with over **3.500m²**

Facility with an installed production capacity of 300 tons per month, manufacturing a **100% virgin product** with a high degree of transparency, excellent finish, and a 10-year warranty against yellowing.

We produce clear and colored acrylic sheets in a wide range of sizes and thicknesses, with custom color development available on demand.

We are pioneers in Brazil in the use of acrylic annealing ovens, delivering superior product quality, outstanding gloss after laser cutting, and reduced polishing time. Our acrylic sheets are cell-cast rather than autoclave-produced, ensuring lower optical distortion and superior optical clarity in the finished parts.

The only Brazilian factory to use imported molds specifically designed for the production of acrylic sheets, ensuring greater precision in sheet thickness.

MAIN PRODUCTS

ACP

Main Applications:

- Internal and external wall coverings, pillars, and beams
- Visual communication with signs and façades
- Building modernization
- Stand and window display decoration
- Vehicle, trailer, and food truck coverings
- Machine and equipment coverings
- Roofs and canopies
- Tunnel coverings

POLYCARBONATE

Compact and Cellular

Main Applications:

- Roof coverings
- Partitions
- Pergolas
- Enclosures
- Machine protection (NR12)
- Protective shields
- Ballistic protection
- Instrument panels
- Walkways

Santiago - Chile

Airport - Florianópolis - SC

- Acoustic insulation

COMPETITIVE DIFFERENTIATORS

Innovation In Research and Development

Embracing the best that technology has to offer in order to enhance what we deliver is part of our daily routine. We are constantly evolving, always one step ahead of innovation, as we begin with research and carry the process through to development.

Vertical Integration

Agility and versatility in production enable us to provide highly customizable product batches according to each client's needs. Vertical integration allows customization on a large scale.

Diversification

The diversity ensured by production flexibility allows us to explore numerous markets, locations, and segments. This way, we invest time in the solutions we can deliver, rather than questioning whether we can deliver them.

Financial Strength

Financial strength supports growth, allowing us to invest in the best materials, promising research, and other acquisitions that add value to the system as a whole.

25 National and International Branches

Stock available for immediate delivery across all 25 branches.

Director's Message

To talk about BOLD's future, it is important to remember how everything began more than **25 years ago**.

The company was born from a great entrepreneurial dream, which I shared with my parents, Arlindo Benedito and Maria Goreti Sebold, and my wife, Nadia Raquel Minelli Sebold. In August 2001, we began our activities in the backyard of my parents' house in Jaraguá do Sul, Santa Catarina. Through hard work and guided by family values, we turned that dream into reality and built a company that is now a benchmark in Latin America.

From the very beginning, we have believed in the strength of the people who are part of our journey — employees, customers, and suppliers. Our culture is shared every day by our leaders and by the "Bolders," as we affectionately call our team. This has allowed us to build a company with solid, sustainable growth, deeply connected to the needs of the market.

Today, with branches in Brazil, Colombia, Chile, Mexico, and China, we continue to expand our presence in the industrial, civil construction, and signage sectors. Our commitment is to create opportunities for our employees and communities, promoting both professional and human growth. This commitment is reflected in our internal recognition, with homegrown leaders taking on strategic positions in new branches and markets.

We are always connected to what is new, valuing diversity and becoming an increasingly global and inclusive company. Our purpose is to contribute to the growth of people and the world, because at BOLD, "the world inspires us."
